

L-Manpak Antenna

1250-1850 MHz

Product Name: MP-1218

Our manpak antenna series offers wideband communications spanning VHF and UHF frequencies suitable for SDR radios. Dipole design means that the antennas will operate efficiently without need for a ground plane. Rugged and compact, they keep units within command reach and mission-ready. Among available features are flexible goosenecks and tape technology for freedom of movement

SPECIFICATIONS:

ELECTRICAL:

Frequency:	1250-1850MHz
Polarization:	Vertical
Pattern:	Omnidirectional
Power:	25 Watts

MECHANICAL:

Height:	16"
Weight:	~9 oz.
Diameter:	1.125"
