

Thank you for purchasing a Shakespeare antenna product. Shakespeare works hard to build reliability and durability into all of its products. Before installing, please study the diagram and check parts supplied against those listed.

IMPORTANT! Please read all instructions before installing.

The Shakespeare 4360 is a multi-function distribution amplifier and power supply that will work with all Shakespeare TV antennas. This device will amplify and distribute off-air TV signals to two TV sets, one additional TV set or DAB receiver, and off-air FM signals to one FM stereo. This unit will also replace the existing power supply that is used with the TV antenna. There is a variable gain control to allow for maximum reception of all received off-air signals.

Tools required: Drill, drill bit for 1/8" mounting screws, screwdriver.

Installation Instructions

Choose a mounting location inside close to all receivers. Additional coax cables with appropriate connectors will be necessary for attachment to the unit (Sold separately). The 4360 can be powered by either 110 volt AC or 12/24 volt DC.

Supplied Parts

- 1 TV/FM splitter box
- 1 AC power cord
- 1 DC power cord
- 2 Mounting screws
- 1 Gain adjustment tool
- 1 Instruction sheet
