

HF Antenna

2-30MHz

Product Name: SKP-16V1

When reliable HF communications are required, the Model 120 HF Antenna System is the obvious choice. Currently deployed on US and NATO radio systems throughout the world, Shakespeare HF antennas provide the reliable communications you demand in the field. The Model 120 Antenna System suits a variety of mountings, antenna heights and configurations. Choose the components you need for your specific application. A custom carry case is available along with a wide variety of mounts. The Model 120's unique design achieves strength and reliability by merely hand tightening the sections. The antenna system takes advantage of Shakespeare's® exclusive design taper rolled thread ferrules to ensure mechanical strength transfer with positive electrical contact, even during flexing. As a result Model 120 is quick to assemble and quick to move. Special assembly tools are not required. One person can assemble and erect the antenna in minutes.

SPECIFICATIONS:

ELECTRICAL:

Frequency: 2-30MHz
Polarization: Vertical
Pattern: Omnidirectional

MECHANICAL:

Weight: ~10lb
Height: 16' 4 sections
Finish: Military Green #23

BASE:

Model:
Power Rating: 1 KW
Termination: Feed thru
Height: 16"
