

# The "Wolf" HF Antenna System

Shakespeare and White Wolf Systems have partnered together to provide an alternative to heavy, burdensome High Frequency (HF) communications mast/antenna solutions currently on the market. This ultra light weight system (~12lbs) allows the operator to rapidly deploy HF communications requirements without the use of a tuner or a burdensome mast.

The primary goal of the "Wolf" Broadband Antenna Kit is to provide the user added capability and performance while reducing weight burden on the user.

The "WOLF" Kit consists of:

- \* The "WOLF" HF Broadband antenna
- \* The Shakespeare Rolatube Elevation System

## Capabilities:

2-30MHz  
Perfect for ALE  
NVIS Broadband / Wideband  
Folded Dipole Design  
Max VSWR <1.5:1 across the band  
No Tuner Required  
Deployed in < 8 Minutes
